PROFESSIONAL EXPERIENCE

Fortune4 Technologies — MERN Stack Developer

March 2022 - April 2026

Project: ConnectWell

Technology Stack: Node.js, React.js, Strapi

- Customized Strapi CMS for managing pages, products and product details.
- Implemented Add to Enquiry functionality with automated PDF quotation generation.
- Developed multilingual functionality with dynamic language switching.
- Integrated backend APIs with React.js for dynamic content rendering.
- Built responsive and reusable frontend components.

Project: RBL NR

Technology Stack: Node.js,Angular js, MySQL

- Developed an admin panel with role-based access control (RBAC) for administrators, managers and agents.
- Developed a fully digital NRI account opening workflow to streamline customer onboarding.
- Designed and developed backend APIs using Node.js.
- Integrated APIs with AngularJS frontend and MySQL database.
- Implemented secure role-based workflows for different user types.

Project: Nex-Robotic

Technology Stack: Next.js, Strapi, MySQL

- Developed a responsive e-commerce platform using Next.js with reusable and responsive UI components.
- Built a Strapi-based admin dashboard for product and content management.
- Developed REST APIs for product catalog, user management and order processing.
- Implemented product listing, search, cart management and order tracking functionality.
- Integrated frontend and backend services for dynamic data rendering.

Project: FWD Insurance

Technology Stack: Next.js

- Developed an interactive mental-wellness campaign portal using Next.js and React.js.
- Integrated Hume AI for emotion analysis and AI-generated responses.
- Integrated Spotify API to recommend mood-based music and generate personalized playlists.
- Built responsive UI components for real-time user interactions and recommendations.

Project: Mizzen Digital**Technology Stack: React js**

- Built a React.js frontend for managing transactions, approvals, and internal fund transfers across multiple user roles (Charter, Operator, Agent).
- Implemented role-based workflows for transaction creation, approval, rejection, and routing.
- Added support for partial payments and tracking fund requirements for various entities and sub-entities.
- Developed interactive ledger reports with weekly, monthly, and yearly transaction insights.

Project: HT School**Technology Stack: Next.js, Node.js**

- Developed the gaming section using reusable components and integrated APIs for dynamic content rendering.
- Built and optimized marketing landing pages with a focus on performance, scalability, and SEO.
- Collaborated with the HT marketing team to support live events, campaigns, and real-time updates.

Project: Tender Bharo**Technology Stack: (Next.js ,payload CMS,postgresql)**

- Developed a full-stack client dashboard using Next.js, featuring tender creation, tender modification, QC updates, bulk tender upload, and user reporting modules with secure API integration and responsive UI.
- Developed the Tender Bharo frontend using Next.js.
- Integrated REST APIs to display dynamic tender data.
- Implemented user login and authentication.
- Built search functionality for quick tender discovery.
- Added PDF download functionality for tender documents.

Plotsify (startup company)**Sep 2021 - Feb 2022****Project: Property Management Portal****Technology Stack: WordPress**

- Developed a WordPress-based property management platform supporting property listings for sale and rent.
- Enabled users to upload properties, manage details, and track inquiries.
- Built features for prospective buyers to browse listings and make purchases directly through the portal.
- Focused on user-friendly navigation to ensure a smooth experience for both property owners and buyers.
- Improved overall transaction efficiency in the real estate process through streamlined functionality.
